

## **WOW! Introduces Whole-Business WiFi Mesh Network to Ensure Secure Transactions and Safer Surfing for Businesses and their Customers**

**ENGLEWOOD, Colo., March 19, 2019** -- [WOW! Internet, Cable & Phone](#) (NYSE: [WOW](#)), a leading broadband and communications service provider, today announced the availability of its WOW! Whole-Business WiFi solution across most of the WOW! Business service-area footprint. Whole-Business WiFi is WOW!'s mesh network solution that provides WOW! Business customers low-cost, easy-to-manage and seamless coverage to keep businesses and their customers securely connected without sacrificing speed or performance.

WOW!'s Whole-Business WiFi solution, which uses the [eero](#) mesh WiFi system, provides fast, secure, and reliable connectivity throughout the business. Instead of using a single router, Whole-Business WiFi blankets your store or small office with internet coverage, enabling your business to run smoothly. No more internet connectivity issues for your point-of-sale system or unhappy customers unable to get online.

Plus, it's easy to install and manage with a user-friendly mobile app: little-to-no IT support required. And Whole-Business WiFi offers customer-friendly features like allowing guests to scan a unique QR code to join the business' guest network, eliminating the need to type in a network name and password. WOW!'s new mesh network solution is also more secure, isolating devices on the guest network from each other and from the business' main network, protecting business transactions and ensuring safer surfing.

"After an overwhelmingly positive response for our roll out of WOW! Whole-Home WiFi last summer, we're eager to introduce this solution for businesses, providing the fastest, most reliable, and most secure WiFi solution to businesses and their customers," said Teresa Elder, CEO of WOW!. " WOW! Business customers will no longer experience slow zones – just WOW! zones, meaning less time troubleshooting, and more time to focus on their business."

WOW!'s Whole-Business WiFi solution is highlighted by its unmatched customer support and comes with a convenient, white-glove installation from a WOW! technician, ensuring your entire business has seamless connectivity. WOW! technicians will customize the WiFi network to your specific needs, giving businesses and their customers the best and most secure connection possible no matter where they're streaming, downloading, video conferencing within the business space.

With 50 billion connected devices expected by 2020, reliable and secure WiFi is absolutely critical for businesses to retain a steady workflow and maintain customer satisfaction.

WOW! Whole-Business WiFi is easily bundled with WOW! Business Internet services. Customers can choose from a handful of fast Internet speed options alongside TV and phone packages that are best suited to each business' needs.
